

This is in regards to the CBA trying to ammend the Do not call list, so they can contact people on the Do not call list. We DO NOT support these actions!!!! If we are currently doing business with them and they wish to contact to Sell some product of thiers, then let them do it through the statements they would send to us or other mails as they do now, so that way we can just throw them away as we do now. We do not want to have disturbing and invading phone calls at the dinner table. The FCC has done a great job in keeping out these intrusions with the do not call list, so hopefully you will support the people once again and deny the CBA their request!!!!
